

## Getting access to BA measurements

**Preamble:** Using equipment of the **Bioanalytics Unit (BA unit)** unit affords registration at the unit including the approval of your entitlement to measure by your group head. The request 'Register with Bioanalytics Unit (BA unit) - SFAB' is accessible at the Services tab on <https://fub.openiris.io>. Please note that you will find this request only after you and your group are properly registered with OpenIRIS and SupraFAB.

The screenshot shows the OpenIRIS interface. At the top, there are navigation tabs: 'Browse', 'Scheduler', 'Services' (highlighted with a red arrow), and 'Dashboard'. Below the tabs, there are search filters: 'Administration OpenIRIS...' (highlighted with a red underline), 'Any resource type' (highlighted with a red underline), and 'register with bioanalytics' (highlighted with a red underline). The search results list two services:

- Register with Bioanalytics Unit (BA unit) - SFAB**: Status: Online. Comments: Registration to the Bioanalytics Unit (BA-unit) enables you to book their facilities. Autonomous usage, however, is restricted to users who have participated at an actual BioLAB safety instruction. Your group must be registered with BioSupraMol and/or SupraFAB. A green arrow points to the 'SUBMIT REQUEST' button.
- Register with Microfluidics Unit (MF unit) - SFAB**: Status: Online. Comments: Registration to Microfluidics Unit (MF-Unit) enables you to book their facilities and services. Autonomous usage, however, is restricted to users who have participated at an actual BioLAB safety instruction. Your group must be registered with BioSupraMol.

At the bottom, there is a pagination control showing '10 items per page' and '1 - 2 of 2 items'.

- Log in and activate the 'Services' tab.
- Select 'Administration OpenIRIS@FUB (BCP)', 'Any resource type' and find 'Register with Bioanalytics Unit (BA unit) - SFAB'.
- Click 'Submit Request' and fill in the form on the opening page.
  - If you are registered with more than one group, make sure to select the group that will pay for your measurements.

The groups' head must then approve your application, because he/she will bear the expenses for the measurements according to the usage policies of the core facility BioSupraMol and SupraFAB rules. Only after this approval, your access to BA measurements will be granted. Give us one or two days.

**Do not forget to log off from IRIS after usage!**
